

ANNA K. LILJEDAHL

Associate Scientist, Woodwell Climate Research Center, working remotely from
Homer, Alaska. 149 Woods Hole Road, Falmouth, MA, 02540-1644
Phone: 907-799-9780, Email: aliljedahl@woodwellclimate.org

PROFESSIONAL PREPARATION

- May 2011 Ph.D. Hydrology, University of Alaska Fairbanks, USA. “*The hydrologic regime of sub-arctic and Arctic watersheds: Present and projected*”.
- Sep. 2005 B.Sc. Earth Science/Physical Geography, Umeå University, Sweden. “*Physical impacts and hydrological model simulations of a tundra watershed affected by fire, Seward Peninsula, Alaska*”.

APPOINTMENTS

- 2020-present Associate Scientist, Woodwell Climate Research Center
- 2020-present Affiliate Professor, University of Alaska Fairbanks
- 2018-present Affiliated Faculty, Purdue University, West Lafayette.
- 2016-2020 Research Associate Professor, Water and Environmental Research Center, University of Alaska Fairbanks.
- 2016-2020 Affiliated Faculty, International Arctic Research Center, University of Alaska, Fairbanks.
- 2016-2018 Research Director, Water and Environmental Research Center
- 2013-2015 Affiliated Faculty, Glaciers Group, Geophysical Institute, University of Alaska, Fairbanks.
- 2011-2017 Associated Faculty, College of Natural Science and Mathematics, Department of Geology and Geophysics, University of Alaska, Fairbanks.
- 2011-2016 Research Assistant Professor, Water and Environmental Research Center and International Arctic Research Center, University of Alaska Fairbanks.
- 2004-2011 Research Assistant, Institute of Northern Engineering and International Arctic Research Center, University of Alaska Fairbanks.

PEER-REVIEWED PUBLICATIONS

- Arp C.D., M.S. Whitman, B.M. Jones, D.A. Nigro, V.A. Alexeev, A. Gädeke, S. Fritz, R. Daanen, A.K. **Liljedahl**, F.J. Adams, B.V. Gaglioti, G. Grosse, K.C. Heim, J.R. Beaver, L. Cai, M. Engram, and H.R. Uher-Koch (2019), Ice roads through lake-rich Arctic watersheds: Integrating climate uncertainty and freshwater habitat responses into adaptive management, *Arctic, Antarctic, and Alpine Research*, 51(1), 9-23, doi.org/10.1080/15230430.2018.1560839.

SYNERGISTIC ACTIVITIES

- Clowder Steering Committee Member*, National Center for Supercomputing Applications, 2020-
- Science Advisory Committee Member*, Arctic Data Center, 2020-present.
- Science Advisory Committee Member*, Polar Geospatial Center, 2019-2021.
- Technical Content Committee Chair*, 2021 Regional Conference on Permafrost, Boulder.
- Kachemak Bay Conservation Society Secretary*, 2020-present.
- Alaska Institute for Climate & Energy Board Member*, 2020-present.
- Portfolio Review Committee Member*, Arctic Sciences Section, National Science Foundation, to advise NSF on how to reform ARC's programs to accelerate the understanding of the Arctic. 2018-2019.
- President*, US Permafrost Association 2018.
- Hiring Committee Member*, UAF Centennial Postdoctoral Initiative, 2017-2018.
- Search Committee Member*, CEM Dean, 2018.
- Chair*, Research Advisory Committee, UAF Faculty Senate, 2017-2018.
- Faculty Senator*, UAF Faculty Senate, 2016-2018.
- Research Director*, Water and Environmental Research Center, 2016-2018 (term limited position).
- Editorial Board Member*, Scientific Reports, Nature, 2014-present.
- Field Safety Committee Member*, UAF, 2016-2018.
- President-Elect*, US Permafrost Association, 2017.
- Search Committee Member*, INE Director, 2015-2016.
- Barrow-Atqasuk Science Advisors Committee*, Primary Representative for Hydrology, 2014-2017.
- President's Committee of Research Administration Review* (declined), 2016.
- Committee Chair*, Unit Merit Criteria development for INE Research Faculty, 2015.
- Committee Member*, Vice Chancellor of Research's revision of Field Travel Plans, 2015.
- Committee Member*, Provost working group on annual faculty activity reporting (Faculty180), 2013-2014.
- Past-President*, American Water Resources Association – Alaska Section, 2013-2014.

President, American Water Resources Association – Alaska Section, 2012.
Secretary, United States Permafrost Association, 2011-2012.
President-Elect, American Water Resources Association – Alaska Section, 2011.
Co-Chair, Arctic Landscape Conservation Cooperative, Hydrology Working Group, 2011.
Board Member, Board of Directors, United States Permafrost Association, 2009-2010.
Executive Committee Member, Permafrost Young Researchers Network, 2009-2010.
Sub-committee Member, Barrow Environmental Observatory, 2009-2011.
Student representative in a committee organized by the National Agency for Higher Education, Stockholm, Sweden, to evaluate geoscience education. *National Agency for Higher Education evaluation report of B. S., M.S. and Ph.D. programs in geosciences at Swedish Universities.* National Agency for Higher Education Report 2004:13R, Stockholm, Sweden

POST-DOCTORAL MENTORING

Melissa Ward-Jones, 2020-present.
Anne Gädeke, 2015-2017.

GRADUATE STUDENT ADVISING

Jordyn Miller, PhD Earth Sciences, Purdue Univ., 2018-present.
Johnse Ostman, M.Sc. Env. Sci., Alaska Pacific Univ., 2013-present.
Bridget Eckardt, M.Sc. Civil Engineering, Univ. of Alaska Fairbanks, 2015-2020
Tiffany Gatesman, M.Sc. Env. Chem., Univ. of Alaska Fairbanks, Co-Chair, 2014-2017.
Angelica Floyd, M.Sc. Geology, Univ. of Alaska Fairbanks, Co-Chair, 2011-2012.
Lei Cai, PhD Atmospheric Sci., Univ. of Alaska Fairbanks, 2015-2018.
Jennifer Davis, M.Sc. Geophys., Univ. of Alaska Fairbanks, 2011-2015.
Maria Kaiser, M.Sc. Env. Engineering, Munich Technical Univ., Germany, Co-Chair, 2014-2015.

UNDERGRADUATE STUDENT ADVISING

Aaron Orr, B.S. Civil and Env. Engineering, 2016-2017.
Patrick Terhune, B.S. Geology, 2016-2017.
Niki Jacobs, B. S. Chemistry, 2015.
Tristan Weiss, Post-B.S. Interdisciplinary, 2014.
Andrew Chamberlain, B.S. Civil and Env. Engineering, 2013.
Salome Scott, B.S. Physics, 2012-2013.
Elliot Clausen, B.S. Civil and Env. Engineering, 2013.

HONORS AND AWARDS

Faculty Senator of the year, UAF Faculty Senate, 2018.
Nominated by the INE Director for the AGU Cryosphere Early Career Award in 2017 and 2018.
Nominated by the Provost for the Blavatnik National Awards for Young Scientists in 2018.
Editor's Choice Awards (Arp et al. 2015), Water Resources Research 2016.
Academic Leadership Institute UAF, participant, 2015-2016
UNAC Merit Bonus Award 2014, Grantsmanship.
The 2012 International Permafrost Association Troy L. Péwé Award for Outstanding Oral Presentation, Tenth International Conference on Permafrost, June 29th, Salekhard, Yamal-Nenets Autonomous District Russia.
UAF Faculty Development Travel Award/Grant, 2012.

CEM travel awards, 2013, 2018.

FUNDED RESEARCH PROJECTS

PRINCIPAL INVESTIGATOR

Total: >\$7,500,000

Quantifying Arctic Mass Wasting Using ArcticDEM

Funding agency: NASA ROSES

Amount: \$135,000 (project total ~\$500,000)

Duration: 2020-2023

Principal Investigator at UAF: AK. **Liljedahl**

Collaborative Principal Investigators: Chunli Dai and Ian Howat, Ohio State University

NNA Track 1: Collaborative Research: The Permafrost Discovery Gateway: Navigating the new Arctic tundra through Big Data, artificial intelligence, and cyberinfrastructure

Funding agency: National Science Foundation, Integrative and Collaborative Education and Research, # 1927872

Amount: \$881,431 (Project total \$3,000,000)

Duration: 2019-2023

Principal Investigator: A.K. **Liljedahl**

Collaborative Principal Investigators: Matthew Jones and Amber Budden, University of California Santa Barbara (#1927720), Kenton McHenry and Aiman Soliman, University of Illinois (#1927729), Jason Cervenec and Aaron Wilson, Ohio State University (#1927920), Chandi Witharana, University of Connecticut (#1927723).

Collaborative research: Patterns, dynamics, and vulnerability of Arctic polygonal ecosystems: From ice-wedge polygon to pan-Arctic landscapes

Funding agency: National Science Foundation, Arctic Systems Science Research, #1722572

Amount: \$737,388 (Project total \$1,317,630)

Duration: 2018-2020

Principal Investigator: A.K. **Liljedahl**

Collaborators: M. Kanevskiy and T. Jorgenson, Univ. of Alaska Fairbanks; R. Daanen, Division of Geophysical and Geological Surveys, AK Dept. Natural Resources; C. Witharana, Univ. of Connecticut (#1720875), H. Epstein, University of Virginia (#1721030).

Description: The goal is to understand the complex and interlinked processes responsible for the evolution of the pan-Arctic ice-wedge polygon tundra landscape by combining field measurements from nine Canadian, Russian, and Alaskan field sites, numerical modeling, and very high spatial resolution optical imagery that has recently become available for the entire Arctic tundra domain.

Riparian shrub expansion: Linkages to permafrost, hydrology and soil microbes

Funding agency: National Science Foundation, Arctic Systems Science Research, #1630360

Amount: \$61,913

Duration: 2016-2017

Principal Investigator: A.K. **Liljedahl**

Collaborators: I. Timling Univ. of Alaska Fairbanks; R. Daanen, Division of Geophysical and Geological Surveys, AK Dept. Natural Resources; Gerald Frost, ABR Inc.

Description: The project is evaluating the linkage between shrubs and hydrology.

Methane release from thermokarst lakes: Thresholds and feedbacks in the lake to watershed hydrology-permafrost system

Funding agency: National Science Foundation, Arctic Systems Science Research, #1500931

Amount: \$2,086,836

Duration: 2015-2018

Principal Investigator: A.K. **Liljedahl**

Collaborators: K. Walter Anthony, V. Romanovsky and D. Barnes, Univ. of Alaska Fairbanks; R. Daanen, Division of Geophysical and Geological Surveys, AK Dept. Natural Resources.

Description: The project is analyzing the role of watershed-hydrology and permafrost dynamics on thermokarst lake methane emissions.

Collaborative research: Developing a system model of Arctic glacial-lacustrine sedimentation for investigating past and future climate change

Funding agency: National Science Foundation, Arctic System Science, #1418274

Amount: \$247,008

Duration: 2015-2018

Principal Investigator at UAF: A.K. **Liljedahl**

Collaborators: Nicholas McKay, Darrell Kaufman, Erik Schiefer, David Fortin, Northern Arizona Univ.; Michael Loso, Alaska Pacific Univ.; Matt Nolan, Univ. of Alaska Fairbanks.

Description: The UAF study is part of a larger project lead by Northern Arizona Univ. Total budget, incl. UAF, is \$1,160,000. The project will develop a system model that encodes the major processes that govern the amount and grain size of sediment that accumulates in Arctic lakes in glaciated catchments.

Collaborative research: What role do glaciers play in terrestrial sub-arctic hydrology?

Funding agency: National Science Foundation, Arctic Systems Science Research, #1304905

Amount: \$844,653

Duration: 2013-2016

Principal Investigator: A.K. **Liljedahl**

Collaborators: J. Zhang, North Carolina Agricultural and Technical State University; Seth Campbell, Univ. of Maine, R. Hock, A. Gusmeroli, Univ. of Alaska Fairbanks; T. Douglas, Cold Regions Research and Engineering Laboratory.

Description: The project aims to develop a comprehensive understanding of glacier-permafrost-hydrology relationships using field measurements and modeling in light of anticipated increases in glacier wastage and permafrost degradation within the discontinuous permafrost region.

Cryosphere-hydrology measurements/modeling and tundra food resources and diet of shorebirds: UAF Participation in "Climate change effects on wetland habitats, invertebrates and shorebirds (CEWISH)"

Funding agency: Arctic Landscape Cooperative

Amount: \$193,000

Duration: 2014-2015

Principal Investigator: A.K. **Liljedahl**

Collaborators: M. Sturm, A. Lopez, K. Tape, Univ. of Alaska Fairbanks; R. Daanen, Division of Geophysical and Geological Surveys, AK Dept. Natural Resources; R. Lanctot and S. Saalfeld, US Fish and Wildlife Service; D. Kesler, Univ. of Missouri.

Description: The overall objective is to describe the spatiotemporal variability in tundra wetland ice wedge polygon pond snow and ice melt. The UAF study is part of a larger project managed by the U.S. Fish and Wildlife Service (R. Lanctot) that focuses on evaluating how climate change may

affect the invertebrate community in shallow surface waters and whether the change in climate could induce a trophic mismatch that might alter the growth and survival of shorebird young.

Estimating future flood frequency and magnitude in basins affected by glacier wastage

Funding agency: AK DOT&PF, PACTRANS and AK University Transportation Center

Amount: \$100,000

Duration: 2012-2014

Principal Investigator: A.K. **Liljedahl**

Collaborators: A. Arendt and R. Hock, Univ. of Alaska Fairbanks; G. Wolken, Division of Geological and Geophysical Surveys, AK Dept. of Natural Resources.

Description: The project estimated future peak flow frequency and magnitude of glacially fed streams and provided partial support to graduate student Jenny Davis's MSc research.

Modeling the impacts of climate change on US Army permafrost and hydrology

Funding agency: Cold Region Research and Engineering Laboratory (CRREL)

Amount: \$329,000

Duration: 2011-2014

Principal Investigator at UAF: A.K. **Liljedahl**

Collaborators: T. Douglas, Cold Regions Research and Engineering Laboratory (overall Principal Investigator); T. Jorgenson, Alaska Ecoscience; S. Marchenko, Univ. of Alaska Fairbanks; and C. Downer and N. Pradhan, Coastal Hydraulics Laboratory (CHL).

Description: The UAF team works closely with CHL to link existing hydrologic (GSSHA) and thermal (GIPL) models. The effort is part of the larger project entitled "Addressing the impacts of climate change on U.S. Army Alaska with decision support tools developed through field work and modeling", which is funded by an award from SERDP-DOD (total budget \$1,790,000).

Improving scientific understanding of the changing hydrologic system of the Jarvis Creek watershed and its impact on the ecosystem.

Funding agency: Alaska Center for Climate and Assessment and Policy

Amount: \$14,091

Duration: 2015

Principal Investigator: A.K. **Liljedahl**

Collaborator: J. Durham, Salcha-Delta Soil and Water Conservation District.

Description: The project supports MSc student Tiffany Gatesman in her work to assess the role of glacier melt on Interior Alaska lowland hydrology.

Hydrograph partitioning of a glacierized watershed, Interior Alaska

Funding agency: National Institutes of Water Resources

Amount: \$18,700

Duration: 2014-2015

Principal Investigator: A.K. **Liljedahl**

Collaborator: T. Trainor, Univ. of Alaska Fairbanks

Description: The project supports M.Sc. Tiffany Gatesman who will assess the hydrologic pathways of glacier wastage within a watershed underlain by discontinuous permafrost and quantify the contribution of glacier melt, snow melt and rainfall to stream runoff.

Monitoring runoff in glaciated watersheds to assess groundwater recharge and flooding risks

Funding agency: National Institute for Water Resources

Amount: \$20,500

Duration: 2012-2013

Principal Investigator: A.K. **Liljedahl**

Collaborators: A. Arendt, Univ. of Alaska Fairbanks

Description: The project supported discharge monitoring at two glaciated watersheds located in continental and maritime Alaska climates and partially financed graduate student Jennifer Davis' M.Sc. research.

Assessing variations in summer river temperature and spring break-up between the foothills and coastal plain through remote sensing, hydrologic modeling, and field measurements, Kuparuk River, Alaska

Funding agency: Alaska NASA EPSCoR

Amount: \$27,000

Duration: 2011-2012

Principal Investigator: A.K. **Liljedahl**

Collaborators: A. Prakash, Univ. of Alaska Fairbanks

Description: The study tested the applicability of remote sensing techniques (SAR) on detecting river break-up. The project supported Angelica Floyd's MSc thesis research, which was completed in December 2012.

COLLABORATIVE INVESTIGATOR

Total: >\$7,100,000

NNA Track 1: Landscape evolution and adapting to change in ice-rich permafrost systems

Funding agency: National Science Foundation, Integrative and Collaborative Education and Research, #1928237

Amount: \$3,000,000

Duration: 2019-2024

Principal Investigator: D. "Skip" Walker, Univ. of Alaska Fairbanks

Collaborators: Y. Shur, V. Romanovsky, G. Kofinas, Univ. of Alaska Fairbanks.

Collaborative Research: Ice regime shifts of Arctic lakes drive interactions and feedbacks with permafrost and climate

Funding agency: National Science Foundation, Arctic System Science, #1417300

Amount: \$1,226,000

Duration: 2014-2017

Principal Investigator: C. Arp, Univ. of Alaska Fairbanks

Collaborators: B. Jones, U.S. Geological Survey; V. Alexeev Univ. of Alaska Fairbanks; A. Parsekian, Univ. of Wyoming; R. Daanen, Division of Geophysical and Geological Surveys, AK Dept. Natural Resources.

Description: The project examines the extent and dynamics of bedfast ice and floating ice lakes in relation to how they functions in and interact with Arctic landscape and climate systems.

Response of an Arctic freshwater ecosystem to climate and land-use change

Funding agency: Arctic Landscape Conservation Cooperative

Amount: \$531,000

Principal Investigator: C. Arp, UAF.

Collaborators: M. Whitman and D. Nigro, Bureau of Land Management; B. Jones, U.S. Geological Survey; M. Wipfli, U.S. Geological Survey and Univ. of Alaska Fairbanks; V. Alexeev and B. Gaglioti, Univ. of Alaska Fairbanks; C. Hiemstra, Cold Regions Research and Engineering Laboratory; J. Adams, US Fish and Wildlife Service; B. Morris AK Dept. Fish and Game; G.

Liston, Colorado State Univ.; R. Daanen, Division of Geophysical and Geological Surveys, AK Dept. Natural Resources.

Description: Assess freshwater habitat change in the Arctic Coastal Plain landscape in order to help federal and state agencies in their long-term wildlife management.

Future glacier and runoff changes in the Susitna drainage basin

Funding agency: Alaska Energy Authority (via AK Dept. Natural Resources)

Amount: \$488,546

Duration: 2012-2015

Principal Investigator at UAF: R. Hock

Collaborators: G. Wolken (overall Principal Investigator), Div. of Geological and Geophysical Surveys, AK Dept. of Natural Resources.

Description: We are conducting hydrologic modeling of the Upper Susitna drainage basin with particular focus on the effect of glacier wastage and permafrost degradation on streamflow into the proposed Susitna-Watana hydroelectric dam.

Next Generation Ecosystem Experiments – Arctic

Funding agency: Department of Energy

Amount: ~\$1,500,000

Duration: 2012-2015

Principal Investigator at UAF: L.D. Hinzman,

Collaborators: S.D. Wullschleger (overall Ngee Principal Investigator), D.E. Graham, L. Lian, R.J. Norby and P.E. Thornton, ORNL; S.S. Hubbard, W.J. Riley and M.S. Torn, LBNL; A. Rogers, BNL; J.C. Rowland and C.J. Wilson, LANL.

Description: Ngee combines field measurements and develops new models to quantify the response of Arctic physical, ecological, and biogeochemical processes to climatic change from the molecular to landscape scale. (<http://ngee.ornl.gov/>)

Predicting climate impacts and feedbacks in the terrestrial Arctic

Funding agency: Los Alamos National Laboratory

Amount: ~\$400,000

Duration: 2012-2014

Principal Investigator at UAF: L.D. Hinzman

Collaborators: S. Painter (overall Principal Investigator) and C. Wilson, LANL.

Description: UAF supports the parameterization of the Arctic Terrestrial Simulator (ATS), which aim to simulate complex interactions among thermal, mechanical, biogeochemical, ecological and hydrologic permafrost processes. The effort is part of a larger award funded to LANL by the Department of Energy.

INVITED CONFERENCE & WORKSHOP PRESENTATIONS

Speaker, Arctic Research Seminar Series, Arctic Research Consortium of the United States, October 28, 2019.

Speaker, Alfred Wegener Institute, Permafrost Research Unit Seminar Series, October 11, 2019, Potsdam, Germany.

Speaker, University of Connecticut, Natural Resources and the Environment Fall Seminar Series, 27 September, Storrs, CT.

Speaker, “Bridging Science, Art, and Community in the New Arctic”, Sept. 23-25, 2019, University of Virginia, Charlottesville.

- Speaker*, Session C53A “Advancing understanding of cold climate hydrologic and geomorphic systems in a warming climate”, American Geophysical Fall Meeting 2018, Washington DC.
- Plenary Speaker*, Arctic streams – The veins and capillaries in a changing cryosphere (Invited Plenary), Second Asian Conference on Permafrost, 2-6 July 2017, Sapporo, Japan.
- Speaker*, Session “Understanding the extent and impacts of land-use/land-cover and climate change on ecohydrology”, American Geophysical Fall Meeting 2016, San Francisco.
- Speaker*, Session “Permafrost degradation and its interrelations with physical, socio-ecological, and socio-economical processes”, American Geophysical Fall Meeting 2016, San Francisco.
- Speaker*, Session “The Arctic freshwater system: past, present, and future”, American Geophysical Fall Meeting 2016, San Francisco. Declined as AGU limits to two invited abstracts.
- Speaker*, Session 8782 “Where when and why will Arctic landscapes get wetter or drier?”, American Geophysical Fall Meeting 2015, San Francisco.
- Speaker*, Alaska Department of Transportation and Public Facilities Annual Hydraulic Engineer Meeting, 14-15 April, 2015, Fairbanks, Alaska.
- Speaker and participant*, “High-Performance & Distributed Computing for Polar Sciences: Workshop on Applications, Cyberinfrastructure Requirements and Opportunities”, National Science Foundation, 4-5 December, 2014, Rutgers University, New Jersey.
- Speaker*, “Ice wedge degradation at multiple Arctic lowland sites“, One-day workshop to develop a strategy for an annual summary of long-term monitoring on Alaska’s North Slope, Wildlife Conservation Society and British Petroleum Exploration, 11 June 2014, University of Alaska, Fairbanks, Alaska.
- Speaker*, “Permafrost hydrology in Alaska”, Workshop to develop joint future permafrost hydrology research in Svalbard, HYDRO-PERM, 24-26 October 2012, Longyearbyen, Svalbard.
- Speaker*, “Water management in Alaska – the Susitna hydropower dam”, SMAP/ICESat-2 Joint Mission Tutorial Workshop, NASA, 18-20 September 2012, Fairbanks, Alaska.
- Speaker*, “The hydrology of Arctic wetlands, its controls and future implications”. Terrestrial Water Cycle Seminar, 24 May 2012, Goddard Space Flight Center, NASA, Greenbelt, Maryland.
- Participant*, U.S. Arctic Observing Coordination Workshop, National Science Foundation, 20-22 March 2012, Anchorage, Alaska.
- Participant in the Hydrology Panel*, Wildlife Response to Environmental Arctic Change (WildREACH): Predicting Future Habitats of Arctic Alaska Workshop. U.S. Fish and Wildlife Service, 17–18 November 2008, Fairbanks, Alaska.
- Speaker*, “The role of meteorological variables on coastal Arctic wetland evapotranspiration”. American Water Resources Association Alaska Section Brown Bag Lunch Meeting, 12 March 2008, Fairbanks, Alaska.

INVITED GUEST LECTURES

- Guest Lecture*, “What is a Pingo?”, Mystic Seaport Museum, February 2018, Mystic, Connecticut
- Guest Lecture*, FISH694/BIOL694 Physical Processes in Freshwater Ecosystems (Jeff Falke), September 2017, University of Alaska Fairbanks, Alaska.
- Guest Lecture*, CE601 Engineering Research Communication (William Schnabel), March 2017.
- Guest Lecture*, FISH492/692, BIOL 492/692 Climate Change Seminar Series (Mark Wipfli), Institute of Arctic Biology, November 2016, University of Alaska Fairbanks, Alaska.
- Guest Lecture*, FISH492/692, BIOL 492/692 Climate Change Seminar Series (Mark Wipfli), Institute of Arctic Biology, December 2015, University of Alaska Fairbanks, Alaska.
- Guest Lecture*, BIOL485 Global Change Biology (Richard Boone), Dep. of Biology and Wildlife, November 2015, University of Alaska Fairbanks, Alaska.

Guest Lecture and field excursion co-leader, “Arctic hydrology and modeling”, International Arctic Research Center Summer School on Arctic in a warming climate: Connection to vegetation, permafrost and hydrology (Vladimir Alexeev). 26 May–9 June 2015, International Arctic Research Center, University of Alaska Fairbanks, Fairbanks and Toolik, Alaska.

Guest Lecture, FISH492/692, BIOL 492/692 Climate Change Seminar Series (Mark Wipfli), Institute of Arctic Biology, October 2014, University of Alaska Fairbanks, Alaska.

Guest Lecture, FISH492/692, BIOL 492/692 Climate Change Seminar Series (Mark Wipfli), Institute of Arctic Biology, October 2013, University of Alaska Fairbanks, Alaska.

Guest Lecture, “An introduction to Arctic hydrology – variability and interactions”. International Arctic Research Center, Summer School on the Modeling of Arctic Climate (Vladimir Alexeev), 26 May - 7 June 2008, International Arctic Research Center, University of Alaska Fairbanks, Barrow, Alaska.

MEDIA INTERVIEWS & CONTRIBUTIONS (incomplete list)

Washington Post, New York Times, National Geographic, Anchorage Daily News, Arctic Today, Fairbanks NewsMiner, San Antonio Express, KUAC Radio Fairbanks, Channel 11, Anchorage, Tanana Valley TV, GlacierHub, American Geophysical Union, Sakha Government News Russia YSIA.RU Russia, CBC Radio Canada (Quirks and Quarks), National Public Radio Sweden, Profil Kommunikation Sweden, Allehanda Daily Newspaper Sweden, and Natursidan.se Sweden.

JOURNAL PEER-REVIEW (incomplete list)

Arctic, Advances in Meteorology, Agricultural and Forest Meteorology, Biogeosciences, Cold Regions Science and Engineering, Environmental Research Letters, Global Change Biology, Geophysical Research Letters, Hydrology, Hydrogeology, Hydrological Processes, Hydrology and Earth System Sciences, J. of Applied Meteorology, J. of Geophysical Research, Nature Communications, Nature Geoscience, Nature Climate Change, Permafrost and Periglacial Processes, Remote Sensing, Science, Scientific Reports, Tellus, The Cryosphere, and Water Resources Research.

PROPOSAL, REPORT AND CONFERENCE PROCEEDINGS REVIEW

National Science Foundation (Hydrological Sciences, Arctic Sciences), U.S. Geological Survey, U.S. Fish and Wildlife Service, International Permafrost Association, Natural Sciences and Engineering Research Council of Canada, German Research Foundation.

FIELDWORK EXPERIENCE

Hydrology (runoff, snow accumulation, ablation, water table, soil moisture, open water evaporation, glacier mass balance), meteorology, soil properties (thermal, hydrological, soil horizon descriptions, active layer depth) in Arctic and sub-arctic Alaska.

SOFTWARE

WaSiM (<http://www.wasim.ch/>), ArcGIS, Surfer, Adobe Illustrator, PowerPoint, Word, Excel.

ADDITIONAL COLLABORATORS

Graduate and Postdoctoral Advisors: Larry D. Hinzman, Douglas Kane, Terry Chapin, John Fox, Kenji Youshikawa, Sveta Stuefer, University of Alaska Fairbanks; Rolf Zale, Umeå University, Sweden

LANGUAGES

English, Swedish

CITIZENSHIP

United States of America (2013)

Sweden

ACHIEVEMENTS AS A GRADUATE STUDENT, M.Sc. and Ph.D.

Student Awards

Outstanding student paper, American Geophysical Union Fall Meeting 2010, Hydrology Section, December 13-17, San Francisco, California.

Outstanding student hydrology poster presentation, 7th International Conference on Global Change: Connection to the Arctic (GCCA-7). 19-20 February 2007, Fairbanks, Alaska.

LAURUS award for outstanding oral presentation, 57th Arctic Science Conference, Arctic Division American Association for the Advancement of Science. 2-4 October 2006, Fairbanks, Alaska.

6th International NCCR climate summer school, Land surface-atmosphere interactions in a changing climate. 26-31 August 2007, Grindelwald, Switzerland.

CLASSIC Spring School, Atmosphere-biosphere interactions. 15-21 April 2007, Abisko, Sweden.

IMPETUS 2007-OSL-APECS-PYRN workshop on permafrost field methods. 29 November-3 December 2007, St. Petersburg, Russia.

The interdisciplinary science workshop for early career polar scientists. 7-9 May 2008, Stockholm, Sweden.

APECS career development workshop. 7 July 2008, St. Petersburg, Russia.

Student Grants

Dixelius Foundation, 2004/2005

The Swedish Institute, 2004/2005

American Water Resources Association, 2007/2008

Global Change Student Research Competition (\$10,000), 2007-2009

Bolick Foreign Student Scholarship, 2007/2008

Gålö/Gemzeus Foundation, 2007/2008

Sweden-America Foundation (\$20,000), 2008/2009

SCAR/IASC travel grant, 2008

UAF Graduate School travel grant, 2008
